1.	((scapula or scapular or scapulae or shoulder blade* or scapulothoracic or scapulo thoracic or scapula thoracic or scapulathoracic or scapulohumeral or scapulo humeral or scapulohumeral or scapula humeral or acromion or coracoid process*) adj4 (abnormal* or abduct or abducts or abducted or abducting or abduction or abductions or adduct or adducts or adduction or adductions or adducted or adducting or alter or alters or altered or altering or alteration or alterations or asymmetry or asymmetries or asymmetrical or asymmetric or dysfunction or dysfunctional or dyskinesia* or dyskinesis or dyskinetic or dysrhythmia or elevate or elevates or elevated or elevating or elevation or elevations or function or functions or functioning or functional or functioned or kinematic or kinematics or kinetic chain* or overhead or overhand or posture or postural or prevalent or prevalence or prominence or protract or protracts or protracted or protracting or protraction or rhythm or retract or retracts or retraction or retractions or retracting or retracted or rotate or rotates or rotation or rotations or rotating or rotated or sick or symmetry or symmetries or symmetrical or symmetric or tipped or tipping or tilt or tilts or tilted or tilting or translation or translations or winging or position or positions or positioning or positional or positioned or motion or motions or orientation or orientations or movement or movements or asymptom* or depression or motor control or dynamic or static or stable or stability)).tw,kf.				
2.	((scapula or scapular or scapulae or shoulder blade* or scapulothoracic or scapulo thoracic or scapula thoracic or scapulathoracic or scapulohumeral or scapulo humeral or scapulohumeral or scapula humeral or acromion or coracoid process*) adj4 (assess or assesses or assessed or assessing or assessment or assessments or evaluate or evaluates or evaluated or evaluating or evaluation or evaluations or examine or examines or examined or examining or examination or examinations or measure or measures or measured or measuring or measurement or measurements or observe or observes or observed or observing or observation or observations or test or tests or tested or testing)).tw,kf.				
3.	1 or 2				
4.	scapula/ or acromion/ or coracoid process/				
5.	(acromion or coracoid process* or scapula or scapular or scapulae or shoulder blade* or scapulothoracic or scapulo thoracic or scapulathoracic or scapula thoracic or scapulohumeral or scapulo humeral or scapulohumeral or scapula humeral).tw,kf.				
6.	(dyskinesia or dyskinesia* or dyskinetic or winging or rhythm).tw,kf.				
7.	biomechanical phenomena/ or dyskinesias/ or isometric contraction/ or motion/ or movement/ or muscle contraction/ or muscle fatigue/ or muscle strength/ or muscle weakness/ or orientation/ or posture/ or prevalence/ or range of motion, articular/ or rotation/				
8.	(joint adj1 (function or mobility or stability or flexibility)).tw,kf.				
9.	((overhead or overhand) adj2 (function* or orientation or orientations or motion or motions or movement or movements or pattern or patterns or position or positions or positioning or positioned or positional or sport or sports or athlete or athletes or throw or throws or throwing)).tw,kf.				
10.	((muscle or muscles or muscular) adj2 (activity or activities or activation or change or changes or changed or changing or contraction* or endurance or fatigue or inflexibility or overuse or strength or tightness or weakness)).tw,kf.				
11.	((abnormal* or alter or alters or alteration or alterations or altered or altering or change or changes or changed or changing or dysfunction or dysfunctional or incorrect or inadequate) adj3 (function* or motion or motions or movement or movements or orientation or orientations or pattern or patterns or posture or postural or position or positions or positioning or positioned)).tw,kf.				
12.	((arm or arms) adj2 (abduct or abducts or abducted or abducting or abduction or abductions or adduct or adducts or adduction or adductions or adducted or adducting or elevate or elevates or elevated or elevating or elevation or elevations or lift or lifts or lifting or lifted or lower or lowers or lowering or lowered or movement or movements or motion or motions or overhand or overhead or position or positional or positions or positioning or positioned or raise or raises or raising or raised)).tw,kf.				
13.	Physical examination/ or muscle strength dynamometer/ or electromyography/ or pain measurement/ or arthrometry, articular/ or physical examination/ or palpation/ or risk assessment/ or imaging, three dimensional/ or anthropometry/				
14.	((assess or assesses or assessed or assessing or assessment or assessments or evaluate or evaluates or evaluated or evaluating or evaluation or evaluations or examine or examines or examined or examining or examination or examinations or measure or measures or measured or measuring or measurement or measurements or observe or observes or observed or observing or observation or observations or test or tests or tested or testing) adj3 (abduct or abducts or abducted or abducting or abduction or abductions or adduct or adducts or adduction or adductions or adducted or adducting or alter or alters or altered or altering or alteration or alterations or asymmetry or asymmetries or asymmetrical or asymmetric or dysfunction or dysfunctional or dyskinesia or dyskinesia* or dyskinetic or dysrhythmia or elevate or elevates or elevated or elevating or elevation or elevations or function or functions or functioning or functional or functioned or kinematic or kinematics or kinetic chain* or overhead or overhand or posture or postural or prevalent or prevalence or prominence or protract or protracts or protracted or protracting or protraction or retract or retracts or retraction or retractions or retracting or retracted or rotate or rotates or rotation or rotations or rotating or rotated or sick or symmetry or symmetries or symmetrical or symmetric or tipped or tipping or tilt or tilts or tilted or tilting or translation or translations or winging or position or positions or positioning or positional or positioned or motion or motions or orientation or orientations or movement or movements or depression or motor control or dynamic or static or muscle or muscles or muscular) or endurance or fatigue or strength or tightness or weakness or mobility or pain or stable or stability)).tw,kf.				
15.	((3D or three dimensional) adj3 (imaging or CT or tomography or wing)).tw,kf.				
16.	((Lennie or slide or endurance or assistance or stability or stabilizing or retraction or repositioning) adj2 test*).tw,kf.				
17.	(acromial distance or arthrometry or dynamometer* or dynamometry or electromagnetic or electromagnetism or electromyography or electromyographic or electromyogram or goniometer* or goniometry or inclinometer* or motion analysis or palpation or scaption or towel wall slide* or wall push up* or anthropometry or arthrometry).tw,kf.				
18.	6 or 7 or 8 or 9 or 10 or 11 or 12 or 13 or 14 or 15 or 16 or 17				
19.	4 or 5				
20.	18 and 19				
21.	1 or 2 or 20				
22.	limit 21 to english language
